
Condasync

Step-by-step transition to SAP Cloud ALM

FAST TRACK SERVICE – Product Description

N° 23

Condasync – Step-by-step transition to SAP Cloud ALM

You are planning to switch from SAP Solution Manager to SAP Cloud ALM and do not want to make the switch at once? With Condasync, you can transfer your process documentation step by step or keep it automatically synchronized between both systems. This way, you can start using SAP Cloud ALM today while safeguarding your investments in solution documentation for the long term.

INITIAL SITUATION

- You have chosen SAP Cloud ALM as the tool for your Application Lifecycle Management.
- You want to secure your long-term investments in process definitions, process models, test cases, or similar assets.
- You want to use both SAP Cloud ALM and SAP Solution Manager without losing the »Single Source of Truth« for solution documentation.

APPROACH

- Introduction of Condasync features
- Preparation of the SAP BTP environment and system integration
- Conducting administrator training
- Updates and support during ongoing operations

RESULTS & BENEFITS

- Tool-supported and continuous synchronization of solution documentation in SAP Solution Manager and SAP Cloud ALM
- Easy configuration of the areas to be synchronized
- Early adoption of SAP Cloud ALM while continuing SAP Solution Manager operations

FACTS

- Annual software rental
- Additional »Vostura ALMEX solutions« for optimizing the use of SAP Cloud ALM
